FRAME-Tite™

FIXING TO STEEL WALL FRAMES

BDN FRAME – Tite™ flat top frame screw is designed for stud to plate connections and connection lintels to plate without pre-punched holes.

STEEL PENETRATION

0.55mm x 2 to 1.00mm x 2

PRODUCT FEATURES

- BN3 1000hrs coating - high performance corrosion coating specifically formulated for steel framing
- Smooth flat top head for discreet fixing
- Superior holding strength
- Easy application

ADAPTER TO USE

Philips Bit (PH3+)

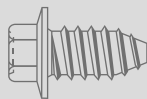

PART NUMBER

SDFHSF0622C3 M6.0-1.00 x 22mm

TRUSS-Tite™

FIXING TO STEEL ROOF AND FLOOR TRUSSES

BDN TRUSS – Tite™ truss screw is designed for the assembly of truss components through pre-punched holes. It fixes into steel ranging from 0.75mm to 1.6mm thick.

PRODUCT FEATURES

- BN3 1000hrs coating - high performance corrosion coating specifically formulated for steel framing
- Superior holding strength
- Self space tapping point makes it easy to start and align in the punched hole
- Easy application

ADAPTER TO USE

Magnetic Hex Socket (5/16")

PART NUMBER

SDHTSF0816C3 M8.0-2.12 x 16mm

METAL-Tite™

TRUSS TO PLATE CONNECTION

BDN METAL – Tite™ fasteners follow Australian AS3566 standards, and are designed for fixing steel trusses to steel ranging from 0.75mm to 1.6mm thick.

STEEL PENETRATION

Max 6.0mm thick

PRODUCT FEATURES

- BN3 1000hrs coating - high performance corrosion coating specifically formulated for steel framing
- Patented Trident Drill Point
- High pull-out strength

ADAPTER TO USE

Magnetic Hex Socket (5/16")

PART NUMBER

SDHC1220C3 12-14 x 20mm
